## DR. SANJAY GROVER

### THE CENTER FOR AESTHETIC PLASTIC SURGERY AND MEDSPA

NEWPORT BEACH, CALIFORNIA  
 BEVERLY HILLS, CALIFORNIA

Diplomate, American Board of Plastic Surgery

#### WHAT PERCENTAGE OF YOUR BREAST AUGMENTATION PATIENTS SELECT SILICONE GEL IMPLANTS OVER SALINE IMPLANTS?

Over 95 percent of my breast augmentation patients select silicone gel implants over saline implants. The FDA approved the return of silicone gel breast implants, clearing them for augmentation and reconstruction procedures six years ago. Most patients select silicone gel implants because they offer a more natural feel. Some patients prefer the newly FDA-approved cohesive silicone gel “Gummy Bear” implants for a more natural look.

#### IS IT TRUE THAT ALL WOMEN CAN ACHIEVE A FLAT TUMMY FOLLOWING PREGNANCY IF THEY JUST EXERCISE?

No. This is a common misconception among husbands and trainers. There are certain physical changes following pregnancy that a woman may not be able to correct on her own, without surgery. An abdominoplasty may benefit many women following pregnancy if they suffer from excess fatty tissue, loose abdominal skin, stretch marks and a loose abdominal wall.

#### WHICH ACCOLADES MEAN THE MOST TO YOU?

I am honored to have been included in the “Top Doc” section of *US News & World Report*, *Castle Connolly* and *Orange Coast Magazine*, as well as the “SuperDoctors” section of *Los Angeles Magazine*. I have also been selected as one of the “Best of OC” in the *Orange County Register* newspaper.

## NONSURGICAL REJUVENATION OPTIONS

The MedSpa utilizes nonsurgical devices for body contouring and cellulite reduction, including CoolSculpting and VelaShape II™, that offer dramatic results with minimal or no downtime. Devices for facial skin lifting/tightening include Ultherapy, Exilis and ReFirme®. Ultherapy's ultrasound treatments can gradually lift the face over the course of three to six months. “Liquid” facelifts are performed with a variety of injectables including neuromodulators (Botox®/Dysport®), fillers (Juvéderm® XC/Restylane®/Perlane®/Radiesse®) and biostimulants such as Sculptra®. A blunt tip microcannula is used to inject fillers in order to minimize any discomfort or bruising.
